

Establish Trust in Delivery by planning, tracking, and reporting on information in a single source of truth

Today's project controls do not produce trusted information

Leading to delays, cost overruns, disputed payments and compliance failures

Progress reporting without verification

Rising governance cost due to lack of trust

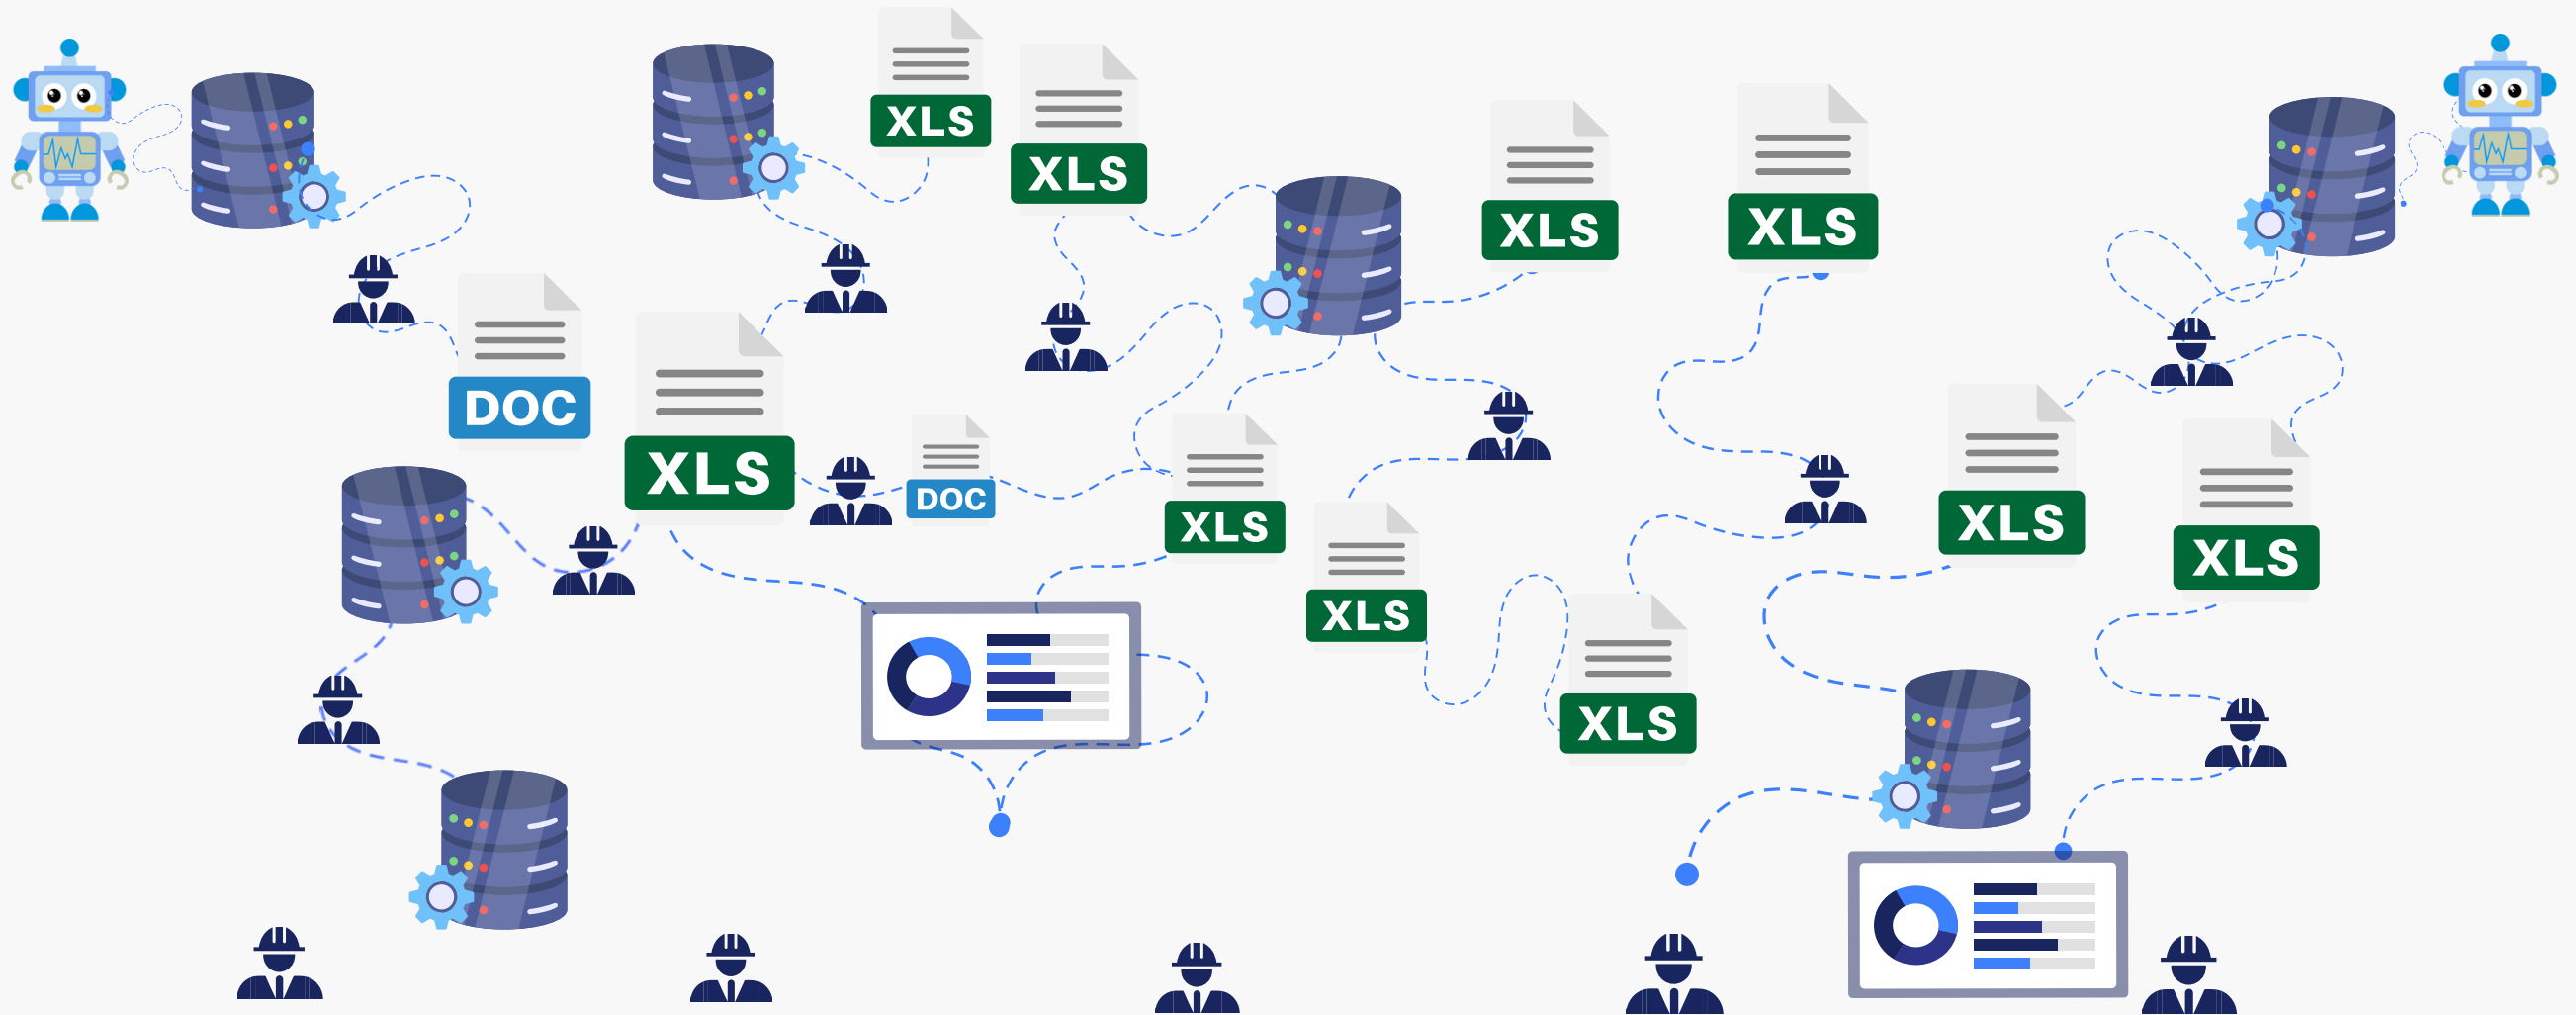

Risk discovered after decisions are made

Decisions made without verified information

Fragmented information prevents trust

No single source of truth. No verified, up-to-date view of progress.

Untrusted information destroys 5–10% of project value

~£40 Million
On a £400Mn Project

Programme delays and cost escalation

Claims, disputes, and commercial friction

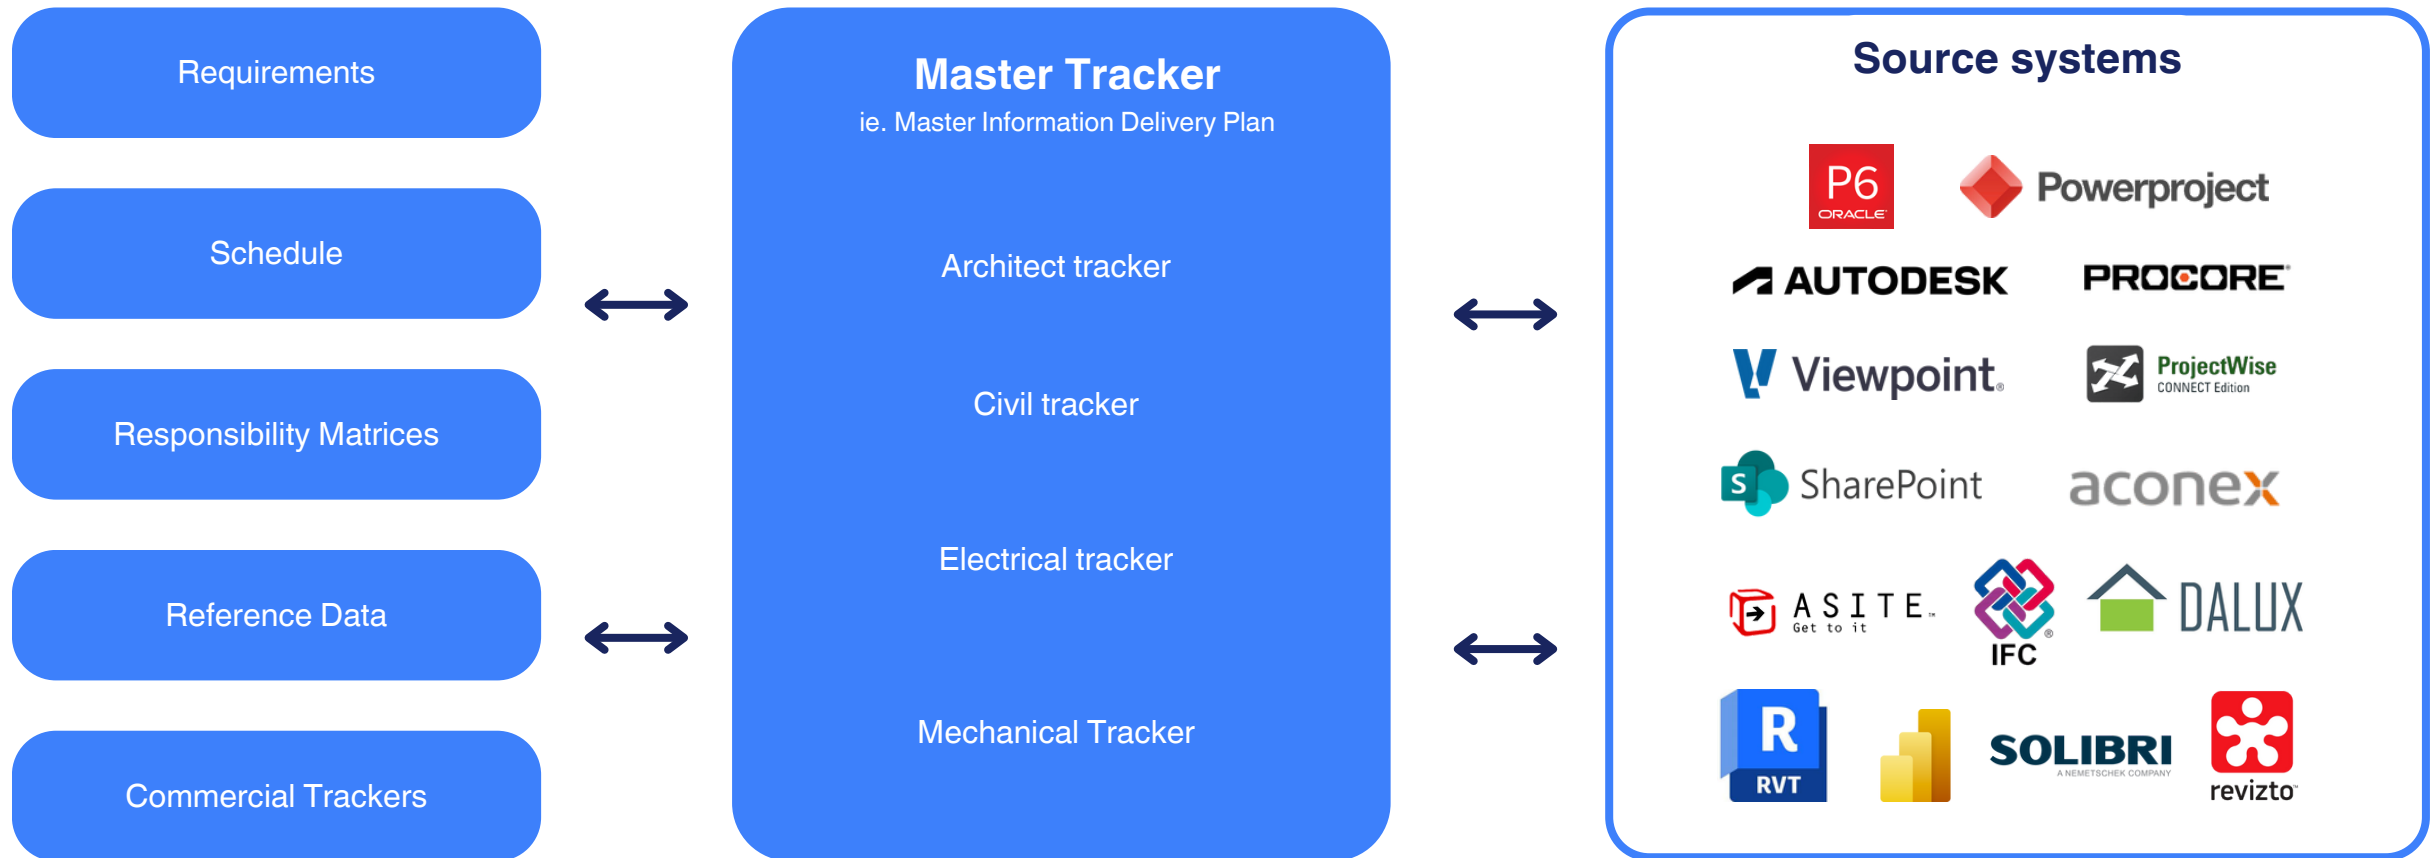

Rework and wasted effort

Assurance gaps at gateways and handover

Increased governance and management costs

Restore trust by continuously reconciling plans with source systems

Requirements and lanned intent are continuously reconciled with delivery evidence

Morta is the AEC platform teams use to keep plans and delivery information aligned

This provides the basis for reliable controls, tracking, and reporting.

Templates – standards and community informed

Configuration – adapt to fit your workflows

Integrations – plans connect to evidence

Collaboration – role-based shared views

Automation – reduces manual tasks

Community - peers who understand you

Empowering information management and digital professionals
to restore trust in delivery

This approach is being adopted by many sectors across 10+ countries

Trusted by a 70+ network of global industry leaders across the supply chain

ALEC increased efficiency by standardising ISO 19650 resources

“Morta provides us with an affordable system and exceptional customer support, enabling us to standardise and connect ISO **19650 resources**. This has significantly **increased our efficiency** while **reducing human error**.”

- Andy Boutle, ALEC

TOP USE CASES

- ISO 19650 Resources
- Workforce mobilisation tracking

BENEFITS

- Reduced Delays and Errors
- Streamline collaboration
- Real-time visibility

ALEC's template hub for ISO 19650 resources

Kier standardised and streamlined delivery planning and tracking

Consistency and standardisation are becoming the norm. Capturing data once and reusing it many times not only reduces errors but also protects margins."

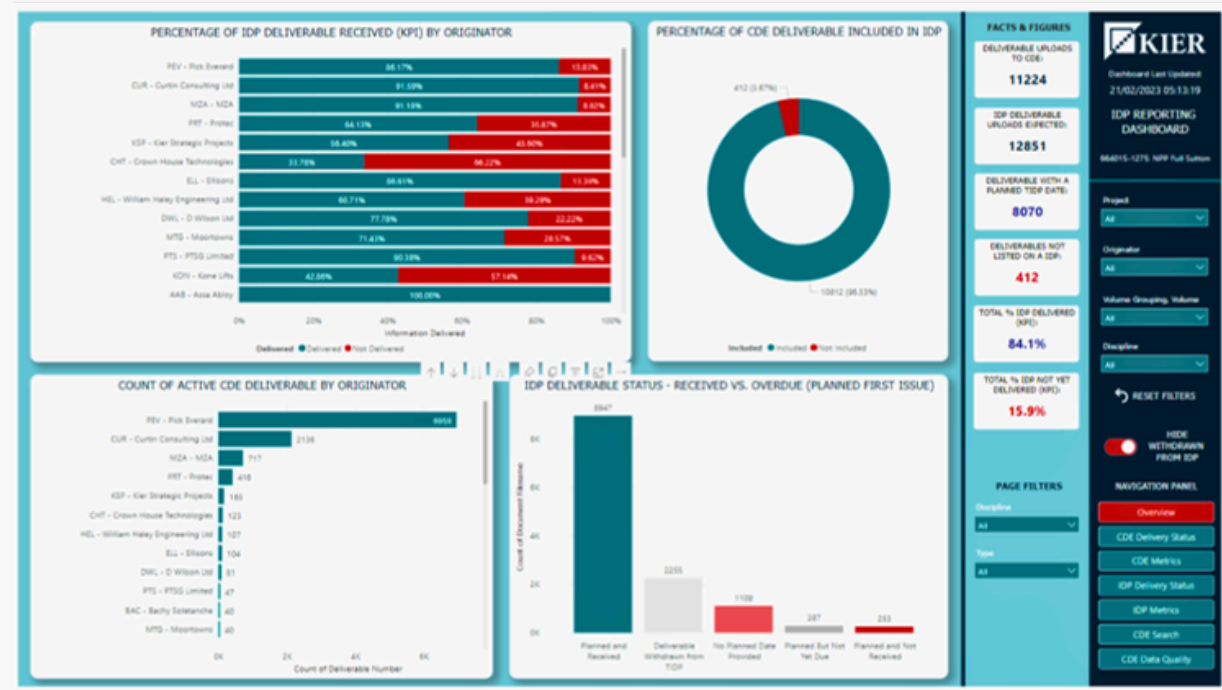

- Colin Bell, Digital Construction Director, Kier Group

TOP USE CASES

- Deliverable planning & tracking
- Work package tracking

BENEFITS

- Visibility on Supply Chain Performance
- Automated assurance against requirements
- Saved 2 days per week in admin tasks

Enterprise dashboard for Kier

Mott MacDonald is scaling its processes for tracking progress

“Morta’s integration with Power BI gave us insights into project progress that we didn’t have before. It’s become an invaluable resource for **over 500 team members** across **30 design disciplines**”

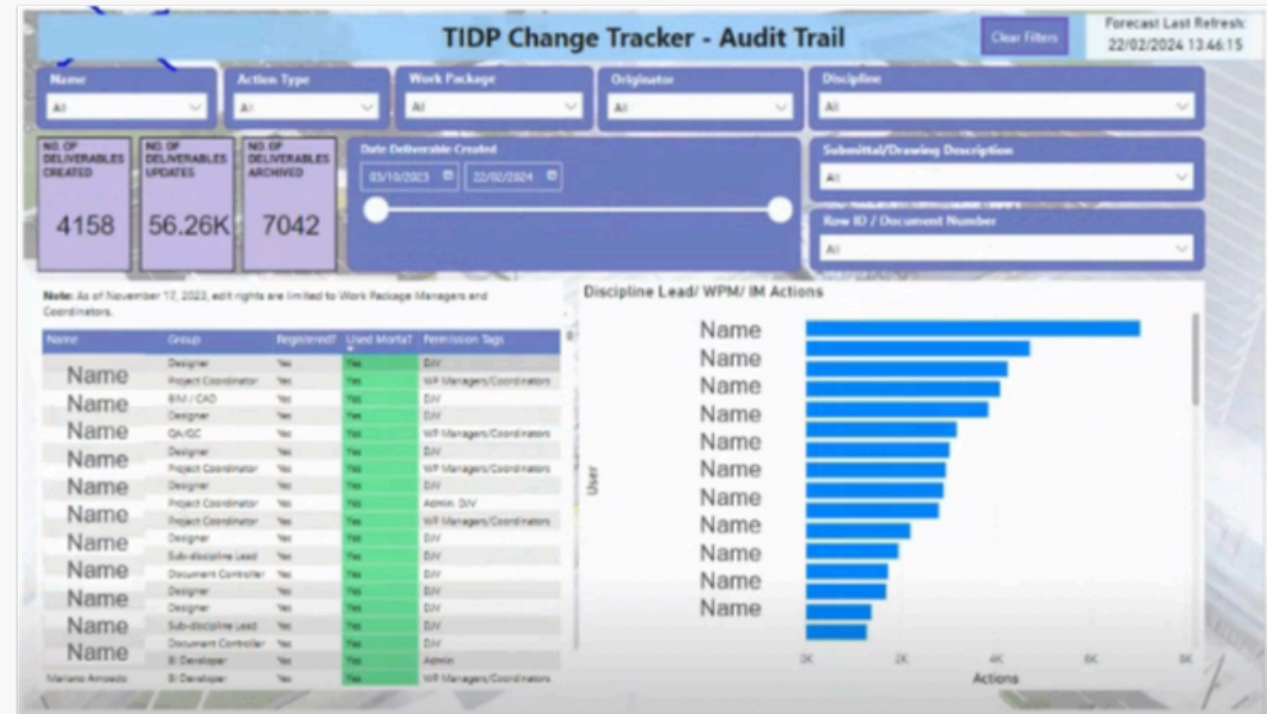

- Mariano Amodeo, Digital Consultant, Mott MacDonald

TOP USE CASES

- Delivery Planning & Tracking
- Document reporting

BENEFITS

- IMs saved 2 days per week
- Visibility on performance and changes
- Scalable approach improving on custom solutions for HS2 jobs

Automated change reporting powered by Morta’s granular audit trails

Connected Information across the Ministry of Justice Estate

“Morta is a key platform in our approach to managing and connecting information across our estate and programmes, allowing us to cut and carve information so stakeholders have the right information at the right time.”

“

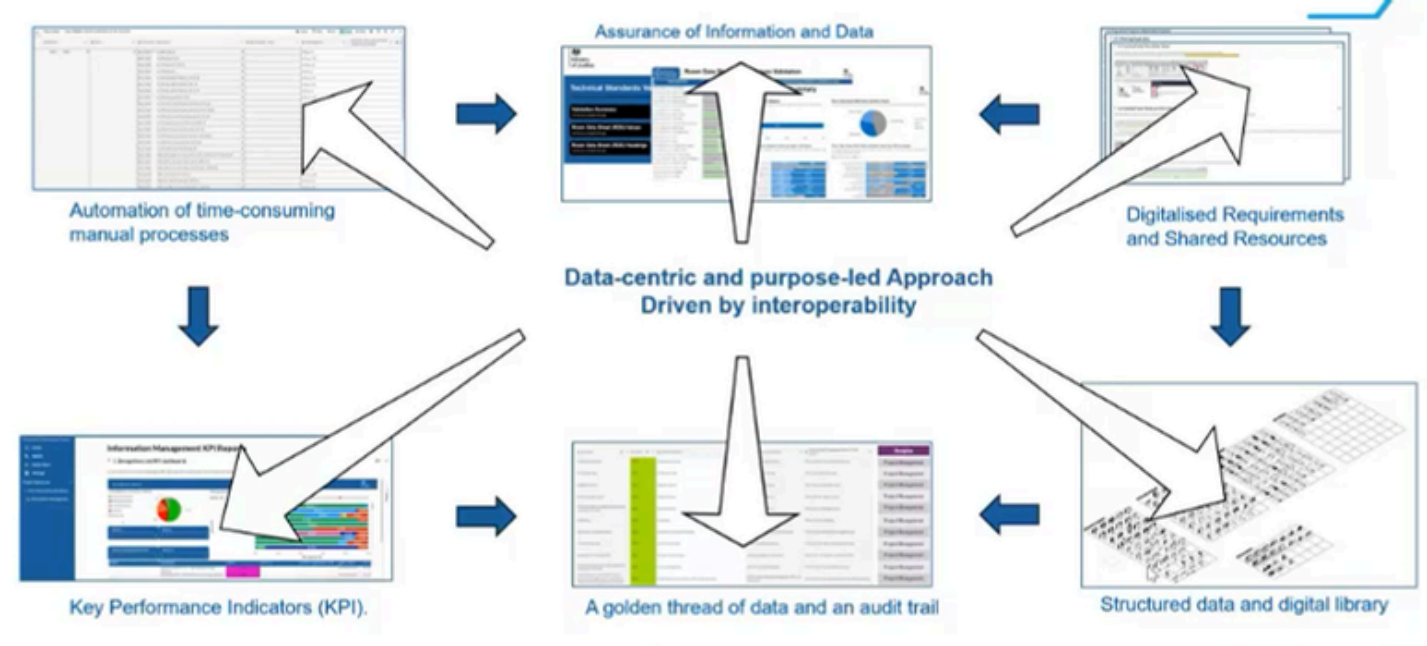

- Jeannine Gavaghan, Senior Information Manager

TOP USE CASES

- Requirements (Technical & Information)
- Tracking Deliverables

BENEFITS

- Automated tracking against 30+ Viewpoint instances
- Reduced no. of requirements managed by 85%
- Achieved consistency and visibility across the estate programmes

The Ministry of Justice's Data Centric Approach

Mace delivers real-time visibility and performance tracking

“Morta allowed us to centralise and automate our compliance checks, giving **real-time visibility** across all projects and **saving us a significant amount of time**”

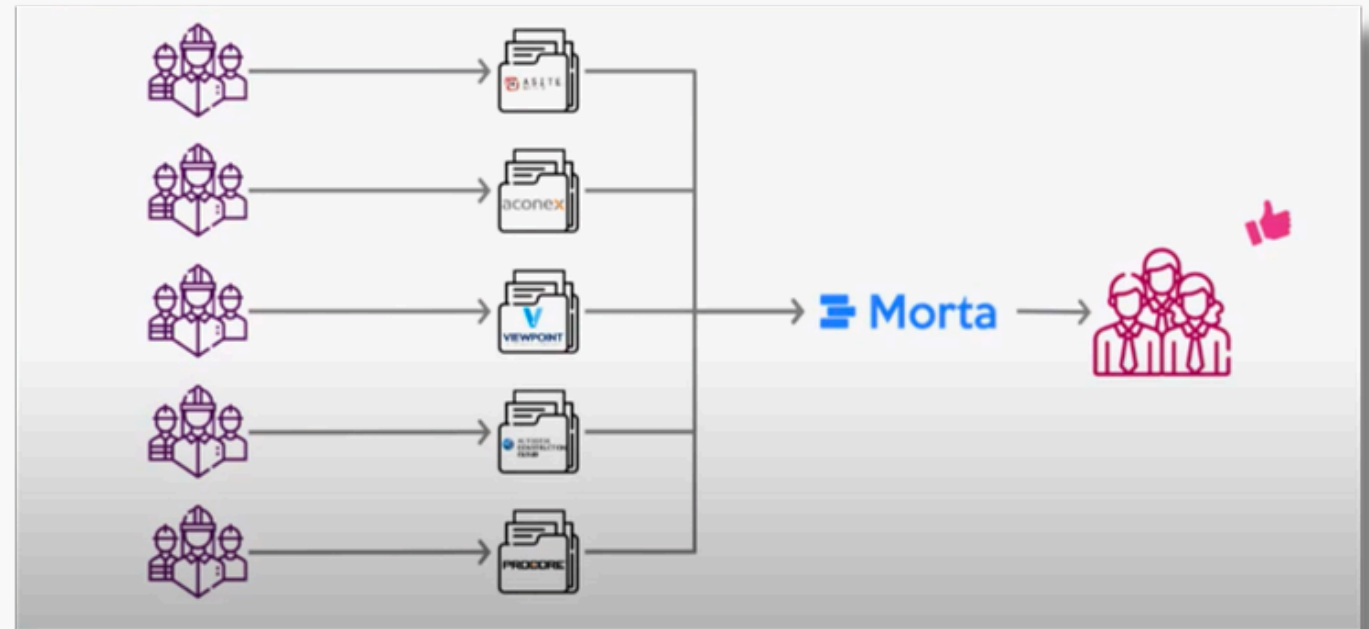

- Jamile Tuma, Associate Director, Mace

TOP USE CASES

- Deliverable review, tracking & reporting
- Earned Value Analysis & productivity tracking

BENEFITS

- Time saved by TAs, Review teams & IMs
- Standardised approach
- Audit trails for all parties

Morta's one-click integrations support standardised & automated reporting

McLaughlin & Harvey drives performance by getting the basics right

“Morta has helped us with our tracking and reporting, pulling together dashboards and giving us visibility on what we're doing. It's no longer subjective—it's the truth as to where we are.”

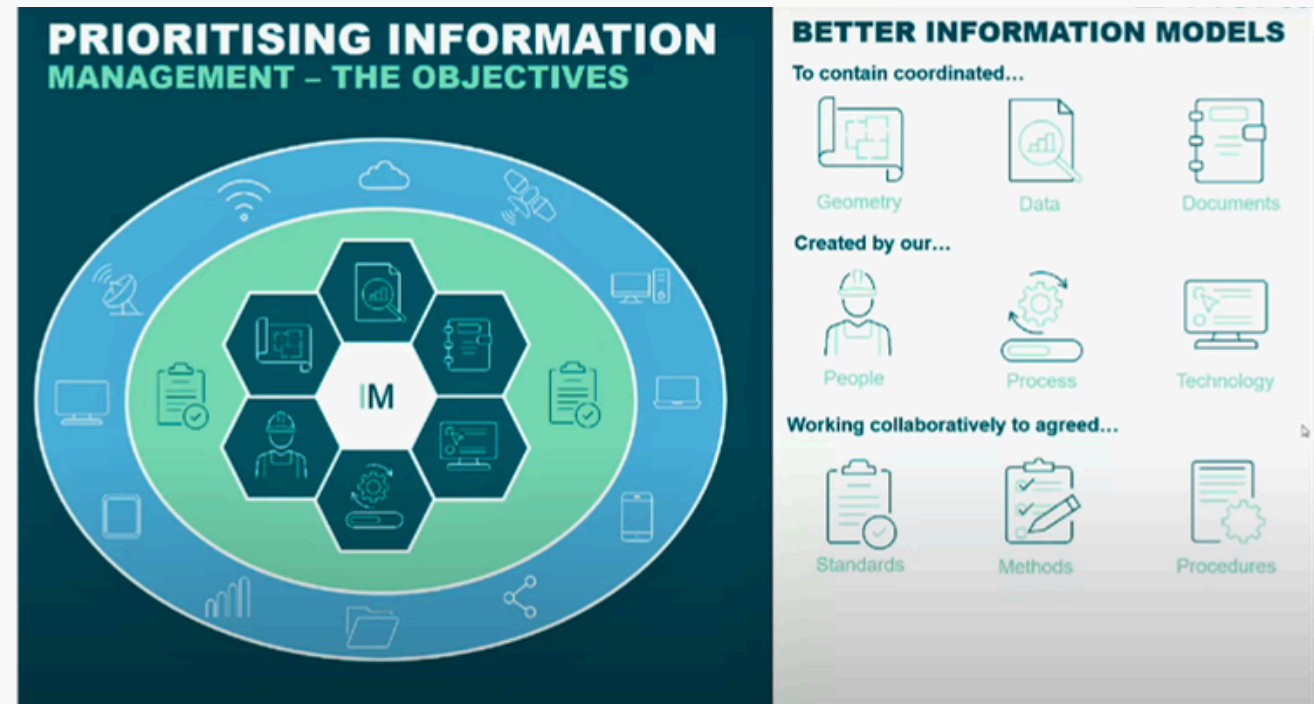

Glenn McCaffrey, Digital Construction Director, McLaughlin & Harvey

TOP USE CASES

- Information delivery planning & tracking
- Asset data assurance & tracking

BENEFITS

- Visibility and transparency on performance
- Increased efficiency
- Alignment with standards

The objectives of the McLaughlin & Harvey team

Babcock enabled continuous automated assurance of model data

Morta's integration with IFC Open Shell has enabled us to automate data assurance, saving hundreds of hours and ensuring top-quality information delivery.”

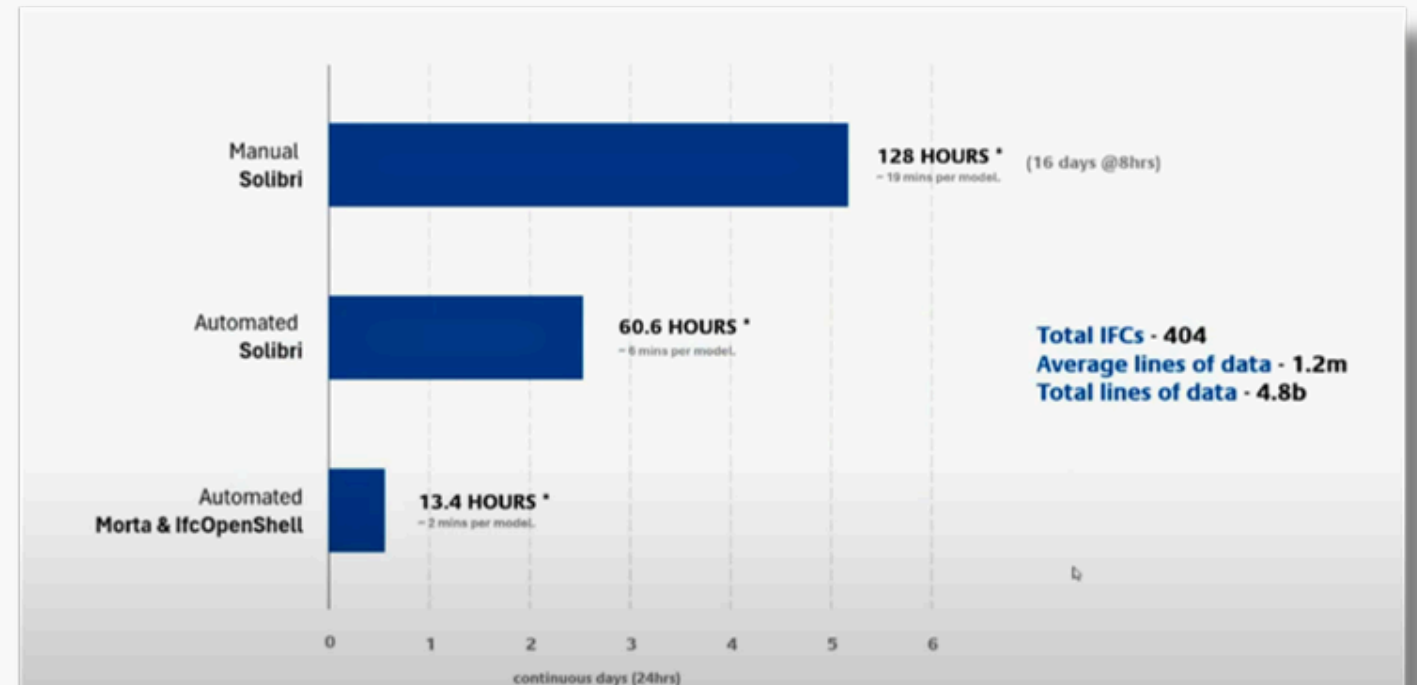

- William Baker-Jones, Deputy Head of BIM and Digital Engineering

TOP USE CASES

- Level of Information Need specification
- IFC Assurance

BENEFITS

- Reduced assurance time by 89%
- Continuous real-time process
- Consistent standards of delivery

Time benefits of automation driven by Morta

Digital Guerilla's validation as a service enables a proactive service

“This is all about quality assurance, not quality control. Quality control is reactive. Quality assurance is proactive. It's making sure we support teams in delivering what the client has asked for”

- Graham Stewart, Director, Digital Guerilla

TOP USE CASES

- COBie Assurance
- Information Delivery Planning & Tracking

BENEFITS

- Granular validation with detailed audit trails
- Real-time visibility for teams to identify gaps
- Automates admin tasks to save time

XD House supported it's Kitemark audit with Morta

“Our assessors were impressed to see us turn up with Morta—a web-based platform for ISO compliance —rather than siloed Word and Excel files.”

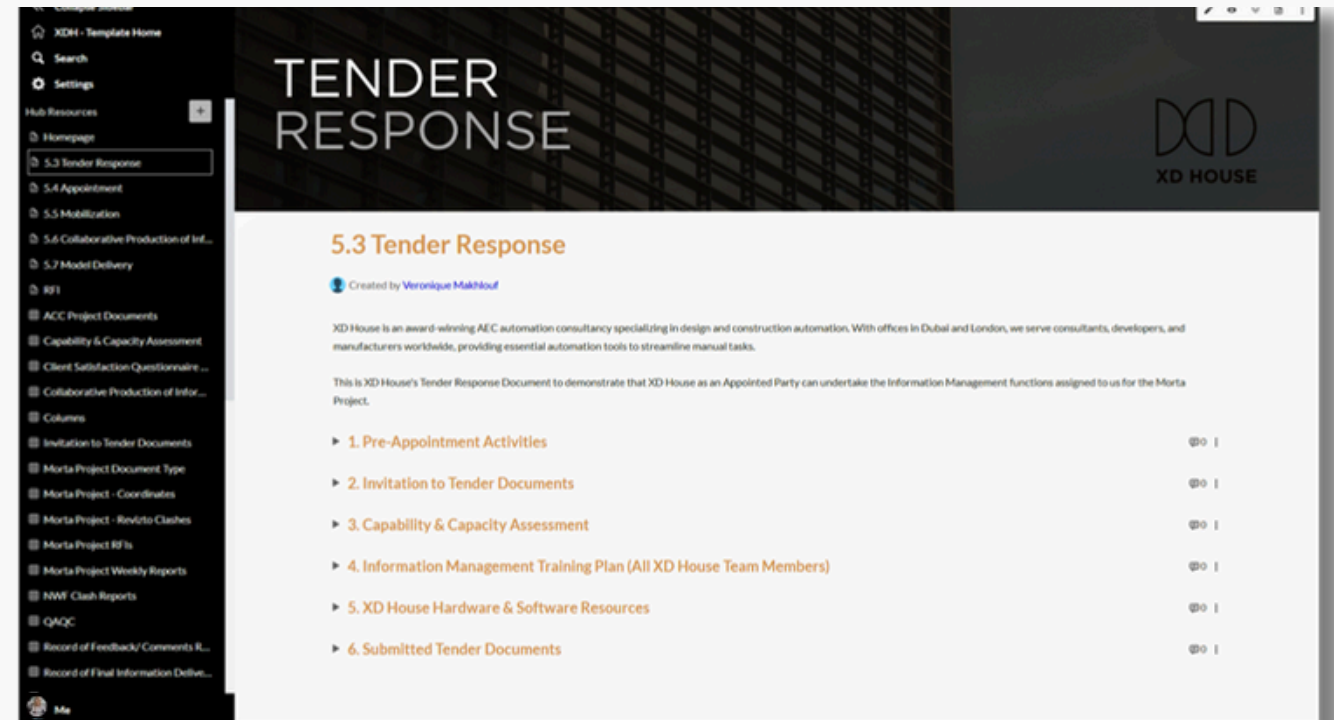

Digital Construction Manager, XD House

TOP USE CASES

- ISO 19650 Resources
- RFI Tracking

BENEFITS

- Aligning to industry standards
- Time savings and automation
- Visibility on performance

Sample resource aligned to ISO 19650 built on Morta
